Net asset value per share (p)	329.7
Discount (premium)	(2.2%)
Historic net yield [‡]	1.2%

PERFORMANCE

Cumulative performance over periods to 31 October 2020

	One month	Three months	Six months	One year	Three years	Five years
Share price	0.4%	4.3%	18.3%	19.2%	46.2%	110.0%
NAV	(2.7%)	1.9%	14.1%	16.3%	41.9%	103.9%
Benchmark	(2.4%)	1.7%	10.8%	5.2%	23.0%	81.5%

12-month performance

	To end Q3 2020	To end Q3 2019	To end Q3 2018	To end Q3 2017	To end Q3 2016
NAV	18.5%	11.4%	13.5%	15.0%	29.2%
Benchmark	5.5%	7.9%	14.2%	15.4%	31.2%
Share price	18.1%	12.1%	13.2%	13.5%	30.8%

Past performance is not a guide to future returns.

Source: Martin Currie. The NAV basis used is cum-income in £. Please note prior to July 2017 the NAV basis used was ex-income NAV in £. Ex-income NAVs exclude current-year income, while cum-income NAVs include current-year income. These figures do not include the cost of buying and selling shares in an investment trust. If these were included, performance figures would be reduced.

Prior to 1 February 2020 the Trust's benchmark was the FTSE World index and the MSCI All Country World Index (ACWI) thereafter.

MANAGERS' COMMENTARY

Chinese internet and gaming giant Tencent was the top outperformer in absolute terms during the month. We think the market is growing increasingly aware of Tencent's robust gaming pipeline with one of its most recent launches, 'Moonlight Blade' also setting a record for the biggest ever mobile game launch in China. Additionally, the well-publicised stock market listing of fintech firm ANT Group may have brought investor attention to the value of Tencent's payments and other fintech businesses. ResMed – a US manufacturer of devices to treat sleep apnea – was another top performer after it reported strong results, with mid-to-high single digit earnings upgrades expected. Elsewhere, Straumann, which manufactures and supplies dental implants, also fared well in October following the release of a positive sales update during the month.

On the other side, payments firm Visa was the biggest drag on portfolio performance: the company's quarterly results were negatively received by the market, with both of the leading US card networks reporting numbers that met expectations but did not evidence an improvement in the lucrative cross-border transactions revenues. While the long-term prospects for the company remain strong, the resurgence of the pandemic is expected to delay the recovery in international travel (and therefore cross-border volumes), creating a short-term headwind. Meanwhile, software firm Adobe's share price took a pause this month after a strong run year-to-date; looking longer term, however, we continue to believe in the growth in Adobe's digital media business.

Elsewhere, after a strong summer performance, the share price of French luxury group Kering gave away some ground as concerns arose about the firm's outlook in key markets, US and Europe.

In terms of portfolio activity during the month, there were no new buys or outright sales.

IMPORTANT INFORMATION

This information is issued and approved by Martin Currie Investment Management Limited. It does not constitute investment advice. Market and currency movements may cause the capital value of shares, and the income from them, to fall as well as rise and you may get back less than you invested. Please note that, as the shares in investment trusts are traded on a stockmarket, the share price will fluctuate in accordance with supply and demand and may not reflect the value of underlying net asset value of the shares.

Depending on market conditions and market sentiment, the spread between purchase and sale price can be wide. As with all stock exchange investments the value of investment trust share purchases will immediately fall by the difference between the buying and selling prices, the bid-offer spread. The value of investments and the income from them may go down as well as up and is not guaranteed. An investor may not get back the amount originally invested.

The majority of charges will be deducted from the capital of the Company. This will constrain capital growth of the Company in order to maintain the income streams.

Morningstar Rating for Funds

Morningstar rates funds from one to five stars based on how well they've performed (after adjusting for risk) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods—three-, five-, and 10 years—and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations.

MANAGER'S BIOGRAPHY

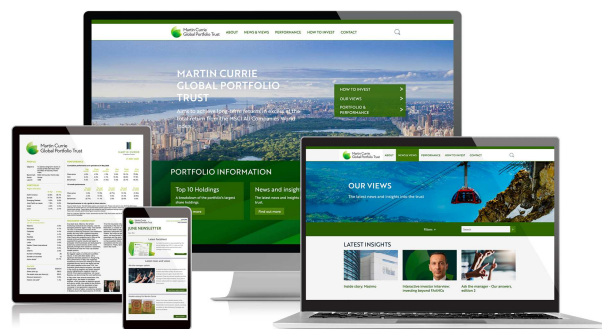

Zehrid Osmani

Zehrid joined Martin Currie from BlackRock where, during his ten years, he played a key part in building their successful European equity franchise. He held a number of senior roles at the company, including Head of European Research, with responsibility for a 23-strong team of analysts. In this role, he developed and implemented a fundamental research platform, demonstrating his strong understanding of equity research. Zehrid also managed a number of equity funds at BlackRock, with a specific focus on managing the team's unconstrained, high conviction, long term portfolios, driven by fundamental research.
