Source: Martin Currie. The NAV basis used is cum-income in £. Please note prior to July 2017 the NAV basis used was ex-income NAV in £. Ex-income NAVs exclude current-year income, while cum-income NAVs include current-year income. These figures do not include the cost of buying and selling shares in an investment trust. If these were included, performance figures would be reduced.

Prior to 30 June 2011 the Company's benchmark was the FTSE All-Share index and the FTSE World index thereafter.

MANAGERS' COMMENTARY

Despite ending in positive territory, July was a jittery month for world markets. Growing fears that a successful resolution to the US-China trade tensions is less likely and questions over whether rate cuts from central banks will be enough to spur economic growth contributed to the market's nervousness. Given the downside risk to economic momentum, the cyclical sectors in materials, and industrials sectors were among those that underperformed the market. Economic momentum continued to look subdued with weak data from US, Europe and China.

At the stock level, Starbucks was the top performer driven by a stronger-than-expected quarter in its key markets, with US and China same-store sales accelerating. A notable contribution to performance also came from the recent purchase in Masimo. The market responded positively to increased optimism from the global medical technology firm after it stated, 'having confidence in the short, medium and long-term'. The biggest drag on performance was the US-based manufacturer of orthodontic products Align Technology, due to weak guidance it gave for revenue growth for the year. The issue centres on China macro concerns among its customers and competition from new, low-end entrants in the US trying to take share through price. We still believe that there is a large runway of growth in clear aligners and that the company is years ahead of its competition.

In terms of trading activity, we bought Masimo and Adobe while selling Check Point and Mettler Toledo. Masimo boasts high barriers to

entry and solid market share with strong recurring revenues growing double digits. For Adobe, a pure play on the proliferation of digital content, we believe its products are crucial in the creation, curation and distribution of content and it offers investors a unique combination of revenue growth and margin/return expansion. We see Adobe as a leader in its sector, gaining market share and improving its return on investment. With regard to sales: on the basis of its lower-growth profile and concerns around the risk of market share loss, we have lower conviction in Check Point as a holding and see stronger alternatives for our capital. The original thesis around Mettler Toledo is unchanged and we believe it remains the leading global supplier of precision instruments and services. However, valuation is currently stretched and we see greater upside in other ideas.

Zehrid Osmani

[†]Source: Martin Currie and FIS APT. Active share is a measure of the percentage difference between the portfolio holdings and the index constituents.

[‡]Source for historic yield: Martin Currie as at 31 July 2019. The historic yield reflects dividends declared for the previous financial year as a percentage of the mid-market share price, as at the date shown. Investors may be subject to tax on their dividends.

The NAV stated in our reporting is inclusive of current year revenue. All sources (unless indicated): Martin Currie as at 31 July 2019.

MANAGER'S BIOGRAPHY

Zehrid Osmani

Zehrid joined Martin Currie from BlackRock where, during his ten years, he played a key part in building their successful European equity franchise. He held a number of senior roles at the company, including Head of European Research, with responsibility for a 23-strong team of analysts. In this role, he developed and implemented a fundamental research platform, demonstrating his strong understanding of equity research. Zehrid also managed a number of equity funds at BlackRock, with a specific focus on managing the team's unconstrained, high conviction, long term portfolios, driven by fundamental research.

WEBSITE

The Company has its own website at www.martincurrieglobal.com

There you will find information on Martin Currie, daily share prices (and associated risks), and you can access regular videos by the manager.

IMPORTANT INFORMATION

This information is issued and approved by Martin Currie Investment Management Limited. It does not constitute investment advice. Market and currency movements may cause the capital value of shares, and the income from them, to fall as well as rise and you may get back less than you invested. Please note that, as the shares in investment trusts are traded on a stockmarket, the share price will fluctuate in accordance with supply and demand and may not reflect the value of underlying net asset value of the shares.

Depending on market conditions and market sentiment, the spread between purchase and sale price can be wide. As with all stock exchange investments the value of investment trust share purchases will immediately fall by the difference between the buying and selling prices, the bid-offer spread. The value of investments and the income from them may go down as well as up and is not guaranteed. An investor may not get back the amount originally invested.

The majority of charges will be deducted from the capital of the Company. This will constrain capital growth of the Company in order to maintain the income streams.
