	One month	Three months	Six months	One year	Three years	Five years
Share price	(2.3%)	1.6%	(3.4%)	3.9%	43.4%	58.3%
NAV	(1.9%)	2.0%	(2.7%)	4.6%	46.1%	48.3%

### 12-month performance

	To end Q2 2018	To end Q2 2017	To end Q2 2016	To end Q2 2015	To end Q2 2014
Share price	3.9%	39.3%	(1.0%)	9.9%	0.5%
NAV	4.6%	28.7%	8.5%	5.7%	(3.9%)

### Past performance is not a guide to future returns.

Source: Martin Currie. The NAV basis used is cum-income in £. Please note prior to July 2017 the NAV basis used was ex-income NAV in £. Ex-income NAVs exclude current-year income, while cum-income NAVs include current-year income. These figures do not include the cost of buying and selling shares in an investment trust. If these were included, performance figures would be reduced.

On 11 July 2014 the investment policy changed from benchmark relative Asia Pacific including Japan to an unconstrained Asia ex Japan strategy.

## MANAGER'S COMMENTARY

Asian equities struggled during June, with the MSCI AC Asia ex Japan index declining 4.0% in sterling terms. As such, none of the regional markets or sectors were in positive territory, although Indian and consumer staples stocks were the least affected.

The company's NAV fell 1.9% over the month.

At a stock level, in absolute terms, Indian financial inclusion services provider Vakrangee was the top contributor. The release of an unqualified audit opinion with the belated annual reports was the main driver of performance, as shares had been hit extremely hard following the resignation of the previous auditor. Meanwhile, Infosys continued its strong performance. Although there was no specific news behind the share price, management commentary has suggested that they are increasingly confident in the outlook for the company - particularly regarding margins, which have been under pressure. Elsewhere, Samsonite's shares also fared well as its shares rebounded in June.

On the other side, Samsung Electronics was weak over the month as analysts became increasingly concerned that the second-quarter results would undershoot previous

expectations. However, consensus still sees profits growing in excess of 20% in 2018, and the shares are trading closer to the bottom end of their historical valuation ranges, rather than at a stretched level. Siam Commercial Bank (SCB) suffered in June alongside the rest of the Thai banking sector, as the market punished the banks for stubbornly high credit costs. Rumours of SCB's chairman stepping down were denied, but also spooked investors. We retain our investment as we expect higher interest rates to lift earnings, and lower costs to improve efficiency and boost the bank's return on equity. Hong Kong-listed regional life insurer AIA was another laggard.

In terms of portfolio activity, there were no new purchases or outright sales.

Andrew Graham

\*The risk outlined at the end of this document relating to gearing is particularly relevant to this company but should be read in conjunction with all warnings and comments given.

<sup>†</sup>Source for historic yield: Martin Currie as at 30 June 2018. The historic yield reflects dividends declared for the 12 months to 31 March 2017 as a percentage of the mid-market share price, as at the date shown. Investors may be subject to tax on their dividends.

The NAV stated in our reporting is inclusive of current year revenue. All sources (unless indicated): Martin Currie as at 30 June 2018.

### Past performance is not a guide to future returns.

<sup>†</sup>From 2014 the company year end changed to 31 March.

<sup>‡</sup>2018 final dividend will be paid in August 2018.

## MANAGER'S BIOGRAPHY

Andrew joined Martin Currie in 2010 and heads our Asia team. Alongside the Martin Currie Asia Unconstrained Trust he is lead manager on the Martin Currie Asia Pacific and Asia Long-Term Unconstrained strategies. He joined us from Sofaer Global Research, bringing with him over 20 years' experience of managing Asia-Pacific equities. At Sofaer, where he was a partner, Andrew managed the company's Japan absolute return fund and co-managed its Pacific-region absolute return fund. Prior to this he spent five years as senior vice president at Putnam Investments, where he co-managed its International Capital Opportunities Fund, focusing particularly on the Asia-Pacific region. Earlier in his career Andrew held portfolio management roles at both Scottish Widows Investment Partnership and Kemper Investment Management.

## WEBSITE

## IMPORTANT INFORMATION

This information is issued and approved by Martin Currie Investment Management Limited. It does not constitute investment advice. Market and currency movements may cause the capital value of shares, and the income from them, to fall as well as rise and you may get back less than you invested. Please note that, as the shares in investment trusts are traded on a stockmarket, the share price will fluctuate in accordance with supply and demand and may not reflect the value of underlying net asset value of the shares.

Depending on market conditions and market sentiment, the spread between purchase and sale price can be wide. As with all stock exchange investments the value of investment trust share purchases will immediately fall by the difference between the buying and selling prices, the bid-offer spread. The value of investments and the income from them may go down as well as up and is not guaranteed. An investor may not get back the amount originally invested. Investment trusts may borrow money in order to make further investments. This is known as 'gearing' and can enhance shareholder returns in rising markets but, conversely, can reduce them in falling markets.

The majority of charges will be deducted from the capital of the company. This will constrain capital growth of the company in order to maintain the income streams.
